TECHNICAL SKILLS+

AWS | JavaScript | jQuery | React | Sass | ActiveRecord | Node.js | JSON | Phaser3 | Tiled | SQLite3 | Ruby | Ruby on Rails Sinatra | Heroku | Firebase | Hugo | Bootstrap | Materialize | HTML5 CSS3 | Git | Github

PROJECTS

Map-Attack | <https://map-attack-app.herokuapp.com/>

Geo-guessing game built in JavaScript and Node.js.

- Implemented the REST Countries API and Google Maps API to allow the user to view questions randomly generated by REST. This passes the country to the Google Maps JavaScript function and plots the given country onto the map for viewing
- Map-Attack uses Node.js as backend to utilize the Express web framework to handle multiple HTTPS requests at a specific url and hide the Google API key

Star-Shipped | <https://star-shipped.herokuapp.com/>

Collaborative Rails application for shippers to help them organize all of the ships in their fleet.

- App uses ActiveRecord to create database tables to create users, ships, jobs and assignments tying them all together with join tables in Ruby on Rails
- Utilizes Devise to hash and salt user encryption and access ownership of data
- Star Wars themed site using Materialize CSS for responsiveness and design

BRB-Arcade | <https://brb-arcade.herokuapp.com/>

Application consisting of three JavaScript mini-games built with Phaser 2 & 3.

- Created Frogger-clone within arcade; using Phaser3 library for added camera effects (fade-in and shaking) for a more intuitive user experience (UX)
- Implemented gamification strategy that randomizes sorting of enemy movement within various loops to enhance difficulty for the user

EXPERIENCE

COMMERCIAL PROCESSOR, NATIONWIDE, HARLEYSVILLE, PA — 07/17 - 07/18

- Executed months of root cause problem-solving research to target an issue within our origination process that caused a major time obstruction affecting thousands of agents within the company

FOOD & BEVERAGE MANAGER, WAWA, PHILADELPHIA, PA — 07/12 - 07/17

- Created and implemented strategies and action plans to reduce waste by 20%, increased express food sales by 50%, and ensured product availability via store communication and training
